## Property Description

Canarian House on the boarder of Santa Ursula / Orotava: Very attractive old Canarian house built in 1899 situated on the hillside in the beautiful Orotava Valley. This property has been tastefully modernised retaining many of the original features such as exposed ceiling beams, wooden floors, shuttered windows, etc. The views from here are amazing overlooking the valley, Puerto de la Cruz & the ocean beyond. The house is 384 m2 and consists of 5 bedrooms, 3 bathrooms, dining room, large lounge, fully fitted kitchen, utility area, and the inside is surrounded by a delightful walking gallery. Outside the house is approached by a long driveway, which leads to a cobbled courtyard with a huge avocado tree in its centre. There is a lovely pool area, a separate BBQ area, 2 old bodegas (90 m2 each) and a huge party room on the lower ground floor stretching the width of the house. Surrounding the house are lovely gardens full of fruit trees. This house must be seen as there are many possibilities here.
